Lockey 2210/3210 Locks

Section: Lockey 2210 Series Deadbolt Keypad Lock

## Lockey 2210 Series Deadbolt Keypad Lock

### Product Overview

#### Lockey 2210 Deadbolt Lock

**OUR MOST POPULAR LOCK!** This is because it is inexpensive and works just about everywhere. People use it in their homes, apartments, town homes, condos, and throughout their businesses. They can be installed on any hinged door or cabinet that is thick enough to accommodate the deadbolt which moves in/out through a hole in the door when it is locked or unlocked.

#### Lockey 2210DC Deadbolt Lock

**GREAT FOR POOLS & GARDEN GATES!** If you are looking for a double-sided lock door that needs a code to open from both sides, then take a look at this one.

It is just like the popular 2210, except that it has a keypad on BOTH sides so you need to know the code to enter or exit.

This lock can be programmed with same or different combinations on either side so it works well for any door that requires a combination to enter AND to exit.

This lock has a deadbolt which you have to manually turn to lock. It can be locked from the inside or outside with the simple turn of the knob. To unlock, simply enter your secret code and turn the knob to retract the deadbolt.

#### Lock Features

- The deadbolt has a free-spinning stainless steel core shaft that cannot be cut with a hacksaw.
- This lock can be used on doors from 1-3/16" to 2" thick. If your door is between 2" to 5" please order the 2000 Series [PT12 Lockey Extension Kit](#).
- Comes with a 2 3/4" or 2 3/8" backset. An adjustable backset upgrade is available for a small fee. If you are planning to use this lock with our [PT01 Lockey Gate Box](#), be sure to order the 2-3/8" deadbolt.
- Covers a 2-1/8" hole.
- This lock has adjustable handedness meaning it can be changed from right to left hand doors.
- We offer a [PT02 Lockey Over-sized Knob](#) for this lock that fits over the outside knob.

Lockey 2210/3210 Locks

Section: Product Overview

## Advantages

1. Comes with a Manufacturer's **Lifetime Warranty**.
2. Hacksaw-proof, bump-proof and cannot be picked.
3. Never again worry about lost, stolen or copied keys.
4. AC power, wires, or batteries aren't needed--this lock is completely mechanical. Therefore, power failures don't affect lock.
5. Easy installation on standard doors.
6. Mechanical reliability.
7. Completely weatherproof finishes.
8. Pays for itself the first time you change your combination.

## Elegant Lock Finishes

Our locks also have a new 7-coat finish, heavy duty zinc alloy, stainless steel and brass components and new, changeable brass combination pins. There are many beautiful finishes (subject to availability) to complement a luxury home, modern office, or stylish garden gate:

### Lock Colors

**Note: only the colors in the list above are available on this lock**

## Key Overrides

A key override is a handy option that lets you lock and unlock these locks using a key OR a combination. This is really great if you have multiple locks with different combinations.

- A key override is available on most 2000 series locks.
- If you order more than one lock with the key override option, you have the option to have them keyed alike or keyed differently.
- Locks with key overrides are installed exactly the same way as regular locks. If you want to make

Lockey 2210/3210 Locks

Section: Product Overview

additional key copies, please order the [PT19 Lockey Key Blank](#).

- Lockey key override locks cannot be keyed alike to any other brand.
- The additional cost is added at the time you add an item to your cart.
- **Manufacturer's Lifetime Warranty does not apply to locks with key override.**

Lockey 2210/3210 Locks

Section: Product Overview

## Installation

This replaces or can be used with your existing deadbolt, latchbolt, or dummy lever.

## Setting your Secret Code

Please note this lock is shipped with 6 red (code) and 9 blue (non-code) tumblers. This allows for a 6 digit code. If you would like to use more or less letter/numbers, please add [PT05 Tumblers](#) to your cart.

*Want us to set your initial secret code?* Simply select the "Custom" option under the *Initial Secret Code* section below and enter your desired custom code (no repeating digits) in the text box. Your code can be anywhere between 3 and 5 digits.

## Locking and Unlocking

Using all our keyless digital locks is quick and easy.

For the **2210**, the lock can be locked or unlocked by just turning the thumb turn. On the outside, you don't need the combination to lock this lock--just turn the knob. To unlock, simply type in your secret code on the keypad and turn the knob to retract the deadbolt. You'll be amazed at how easily it works!

For the **2210DC**, the lock has a knob handle, on both the inside and outside bodies, to open the door. To unlock from the inside and outside, simply type in your secret code on the keypad and turn the knob to the right to retract the deadbolt and open the door. It couldn't be easier!
