Lockey M Series Locks

Section: Lockey M210 Home Deadbolt Keypad Lock

Lockey M210 Home Deadbolt Keypad Lock

Product Overview

OUR BEST PRICE! This is one of our newest additions to our product line and our most economically priced lock. This deadbolt lock has the exact same quality as our other 2000 Series locks, but with a few less buttons and a smaller size, so it draws less attention.

Lock Features

- Fits any standard door 1-3/8" to 2" thick. If your door is between 2" to 5", please order the M210 Series [PT12 Lockey Extension Kit](#).
- Covers a 2-1/8" hole.
- Comes with a 2 3/4" or 2 3/8" backset. An adjustable backset upgrade is available for a small fee.
- Small profile to fit in narrow spaces.
- Works with both right and left hand doors.
- Maximum security with free-spinning stainless steel core shaft that cannot be cut with a hacksaw.

M210 Home Deadbolt

Comes with an optional EZ Mounting Plate (additional cost) which does not require any drilling. You can use this if your door already has a standard size bore hole of 2-1/8" diameter.

Advantages

1. Comes with a Manufacturer's **Lifetime Warranty**.
2. Hacksaw-proof, bump-proof and cannot be picked.
3. Never again worry about lost, stolen or copied keys.
4. AC power, wires, or batteries aren't needed--this lock is completely mechanical.
5. Power failures don't affect it.
6. Easy installation on standard doors.
7. Mechanical reliability.
8. Completely weatherproof finishes.
9. And best of all, the first time you change the combination, this lock will pay for itself by saving the cost of a locksmith.

Lockey M Series Locks

Elegant Lock Finishes

Our locks also have a new 7-coat finish, heavy duty zinc alloy, stainless steel and brass components and new, changeable brass combination pins. There are many beautiful finishes (subject to availability) to complement a luxury home, modern office, or stylish garden gate:

What's in the Box

Lockey M Series Locks

Section: Lockey M210 Home Deadbolt Keypad Lock

Lock Dimensions

Height	Width	Depth	
Outside Lock Body (without thumb turn)	4-15/16 in	1-1/2 in	7/8 in
Outside Lock Body (with thumb turn)	4-15/16 in	1-1/2 in	1-13/16 in
Inside Lock Body (without thumb turn)	4-7/8 in	1-7/16 in	7/16 in
Inside Lock Body (with thumb turn)	4-7/8 in	1-7/16 in	1-1/4 in
Outside Thumb Turn	1 in	1/4 in	1 in
Inside Thumb Turn	1 in	1/4 in	3/4 in
Trim Plate	5-5/8 in	2-1/2 in	3/16 in
Strike Plate	1 in	2-1/2 in	1-1/8 in

Note: If you are going to install this lock underneath an existing deadbolt, you will need at least 2-3/4 inches from the bottom of the deadbolt down to the top of the large hole for this lock. If you are going to install this lock above an existing deadbolt, you will need at least 2-3/4 inches from the bottom of the deadbolt down to the top of the large hole for this lock. The bore hole should be between 1 inch to 2-1/8 inches.

Installation

This replaces or can be used with your existing deadbolt, latchbolt, or dummy lever.

Setting your Secret Code

Please note this lock is shipped with 5 red (code) and 10 blue (non-code) tumblers. This allows for a 5 digit code. If you would like to use more or less letter/numbers, please add [PT05 Tumblers](#) to your cart.

Want us to set your initial secret code? Simply select the "Custom" option under the *Initial Secret Code* section below and enter your desired custom code (no repeating digits) in the text box. Your code can be anywhere between 3 and 5 digits.

Locking and Unlocking

Using all our keyless digital locks is quick and easy. On the inside, this lock can be locked or unlocked by just turning the thumb turn. On the outside, you don't need the combination to lock this lock--just turn the turn knob. To unlock, simply type in your secret code on the keypad and turn the knob to retract the deadbolt. You'll be amazed at how easily it works!

Lockey M Series Locks

Section: Lockey M220 Home Surface-Mounted Keypad Lock

Lockey M220 Home Surface-Mounted Keypad Lock

Product Overview

WHEN A DEADBOLT WON'T WORK... This surface mount lock is very similar to the 2200 Surface Mount Lock, except that it has a thumb turn instead of a knob and two less buttons. Its smaller size also draws less attention. The locking mechanism of this lock is not a deadbolt, but a sliding bar that moves back and forth to open and close the lock. The slide bar has two sizes: short or long, to fit almost any application. This lock comes complete with everything you need including all mounting instructions, brackets, and trim plates.

Because it is surface-mounted, this combination lock works really well anywhere that a hole for a deadbolt cannot be made in the door like on pool and garden gates, aluminum store front doors, thin entry doors, cabinet doors, liquor cabinets, gun cabinets, even commercial refrigerators.

Lock Features

- Fits any standard door 1/8" to 2" thick. If your door is between 2" to 5", please order the [PT12 Lockey Extension Kit](#).
- Covers a 2-1/8" hole.
- Long (1-1/2" throw) & Short Bar (3/4" throw).
- Small profile to fit in narrow spaces.
- Works with both right and left hand doors.
- Maximum security with free-spinning stainless steel core shaft that cannot be cut with a hacksaw.

Advantages

1. Comes with a Manufacturer's **Lifetime Warranty**.
2. Hacksaw-proof, bump-proof and cannot be picked.
3. Never again worry about lost, stolen or copied keys.
4. AC power, wires, or batteries aren't needed--this lock is completely mechanical.
5. Power failures don't affect it.
6. Easy installation on standard doors.
7. Mechanical reliability.
8. And best of all, the first time you change the combination, this lock will pay for itself by saving the cost of a locksmith.
